

**Maps** use rich, detailed mapping to show exact location of entire fleet. Traffic, satellite, weather, and agency specific POI are also included.

**Bread crumbs** show the historical GPS points recording time, date and speed of vehicle travel.

**Setup tool** allows you to quickly configure fleeteyes to your agency needs.

**Access** fleeteyes from an internet browser, BlackBerry, iPhone or Windows Mobile Smart Phone.

**Routing** provides vehicles with turn by turn directions to the incident.

**Points of interest** allow dispatchers to search and navigate resources when needed.

**CAD Integration** allows legacy dispatch systems to seamlessly feed incidents to fleeteyes combining one or more CADs together.

**Playback** system gives minute by minute forward and backward view of all incidents and vehicles.

**Security** restricts access to what is needed for user's job function.

## About fleeteyes

**fleeteyes** is a fast growing provider of systems designed to optimize cross jurisdictional cooperation. **fleeteyes** fuses information from separate systems for easy collaboration among multiple agencies regardless of the platform. Our users include commercial ambulances, hospital based EMS, municipal EMS, air medical, fire services, health departments and hospitals.

Visualize. Connect. Collaborate.
